

How it started! The ebay listingOn the day all the bits laid out ready.

So it begins, Airbox first..... lay the engine on its side, put the frame over it.

Aside from some fashion statements , all's well and once on the bench the swing arm is offered up.

In goes the shiny back wheel, while at the other end a couple of shady characters are hiding 2p pieces.

Must've been those 2p's that made it heavy eh?

The chain fitting needed supervision obviously.

It goes where?

But must've got it right because now it looks like these fit here.

3 stooges are bright sparks!

It got really late but after this picture the photographer went to the pub. The electric gremlins were vanquished “she lives”!!!!!! The next morning early on, the finishing touches “Bleedin’ Brakes”

As the club waits the bike goes for it's 10am Appointment with the MOT man.....will it pass?

Alan from Cadishead Motorcycles gives the finished product a proper inspection

But has it passed?

Back at the pub, The Team of pop up builders proudly assemble for the “He say YES “ verdict. So from the bits in the marquee to a restored, roadworthy bike in 24hrs. For £1000. 6 Months start to finish .

other side on, just to prove it wasn't half a job.... The screen a one off made by member with logo etched in.

Cord from Germany is presented the really old style V5 and keys. "Not so bad for £5 raffle ticket".
